

# AMAZING: COVID-19 Cases in Indonesia Plummet After Government Authorizes IVERMECTIN For Treatment

By Jim Hoft

Published October 9, 2021 at 10:50am

521 Comments

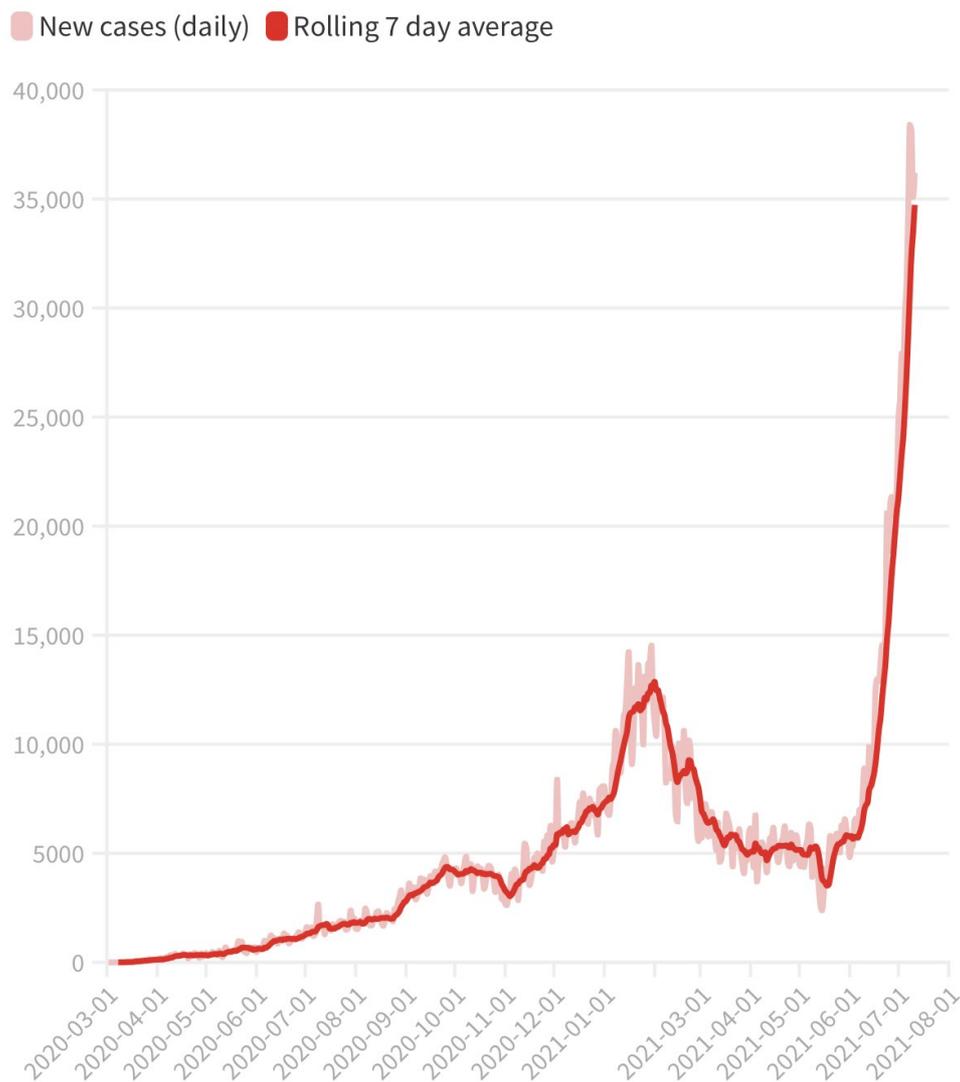

In July 2021, the Indonesian Food and Drug Monitoring Agency (BPOM) finally granted the Emergency Use Authorization for Ivermectin as the therapeutic drug to cure the Covid-19.

This was due to the country's "worst-case scenario" epidemic at the time according to officials.

Indonesia experienced a spike in COVID-19 infection and deaths in July and was struggling to slow the virus transmission due to its high

population. Indonesia is ranked as the world's fourth most populous country.

Source: [Our World In Data](#)

**The government imposed an emergency measure to slow the spread of the virus. One of its measures was to authorize the use of Ivermectin as a COVID-19 treatment.**

**The Strait Times** reported:

*The Indonesian government on Thursday (July 15) began distributing free medicine and vitamins to self-isolating Covid-19 patients in high-risk areas as the highly transmissible **Delta variant of the coronavirus continued to rip through the country**, emptying pharmacy shelves.*

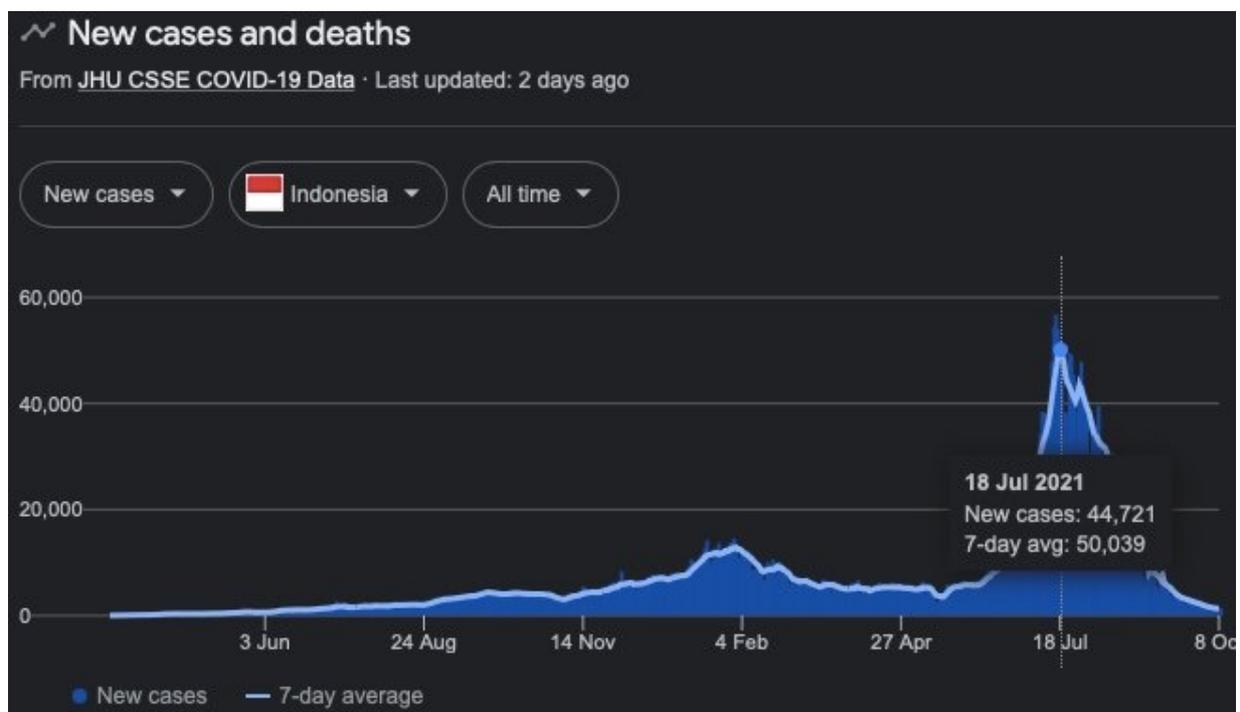

Each package will have seven days worth of therapeutic Covid-19 drugs and vitamins, and will be given to asymptomatic patients as well as those with mild to moderate symptoms including fever and dry cough. The medication for the latter group will require consultation with a doctor and a prescription.

Medical facilities are stretched thin, **and demand for oxygen and medication has also soared.** As scores of people are isolating themselves at home and self-medicating, prices of drugs have shot up in pharmacies and online. The health ministry has since moved to cap the prices of drugs such as favipiravir, remdesivir and ivermectin.

Indonesia's food and drug agency has authorised ivermectin for emergency use against Covid-19, Reuters reported, although the World Health Organisation, as well as European and the US regulators did not recommend its use for Covid-19 patients.

**After the government authorized the use of Ivermectin for COVID-19 patients, the number of cases significantly plummeted since July.**

**The data below proves that Ivermectin played a role on the steep decline of COVID-19 cases despite having a low vaccination rate.**

As of October 8, only 20.5% were fully vaccinated and 35.9% got their first dose.

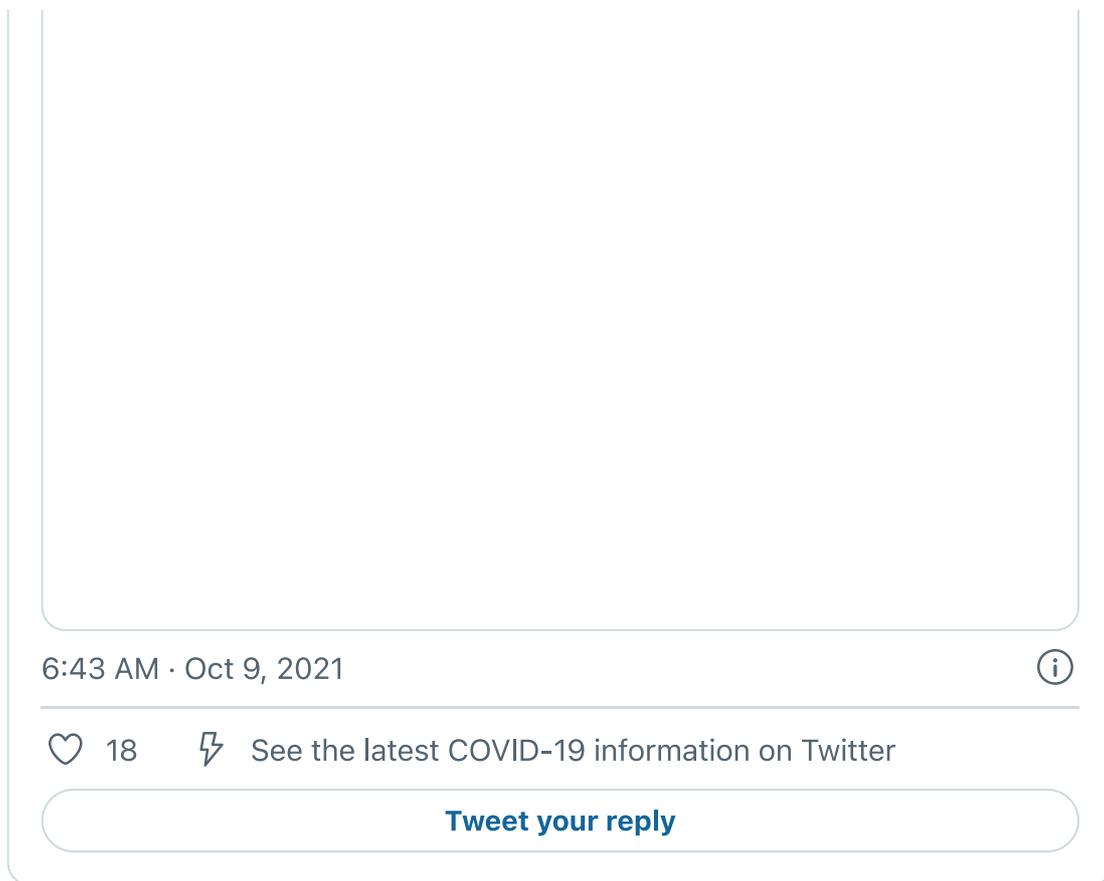

**One Twitter user posted a comparison between India and Indonesia's success with Ivermectin as a treatment for COVID-19.**

**Ganteng\_Energy28**  
@AnakCrypto28

Replying to @HelenFa92229708 and @DrEliDavid

Fortunately, in Indonesia doctors are allowed to prescribe Ivermectin since end July 2021. Although people cant buy it freely from pharmacy.

Indonesia currently have 8 hospital running clinical trial for Ivermectin Protocol and please look at their mortality after IVM vs India

The Gateway Pundit previously reported the same scenario in **Uttar Pradesh, India**. The 33 districts in Uttar Pradesh, India have now become free from COVID-19. The recovery rate has increased up to 98.7% proving the effectiveness of IVERMECTIN as part of the “Uttar Pradesh Covid Control Model.” Of course, the media won’t mention that Ivermectin is being used for the treatment of COVID-19.

Uttar Pradesh is the leading state in India to use Ivermectin as early and preventatively in all family contacts. And this state is one of the five lowest COVID cases of all states in India despite having only a low vaccination rate.

You can read the rest of the story here:

## HUGE: Uttar Pradesh, India Announces State Is COVID-19 Free Proving the Effectiveness of “Deworming Drug” IVERMECTIN

The Gateway Pundit previously reported that COVID cases are plummeting in India thanks to new rules that promote Ivermectin and hydroxychloroquine to its massive population. The 33 districts in Uttar Pradesh, India have now become free from COVID-19 government informed on Friday. The recovery rate has increased up to 98.7% proving the effectiveness of IVERMECTIN ... ***AMAZING: COVID-19 Cases in Indonesia Plunge After Government Authorizes IVERMECTIN For Treatment***

It has become quite clear what countries are trying to kill their citizens !

ENOUGH yet America ?

33 ^ | v · Reply · Share ›

**Sir TuberKopf** → John (magnum) · 16 hours ago

The US government has all the data, even though VARS has corrupt data to promote the Marxist agenda, the Medicare system has all the data since they pay for everything that happens medically to a large segment of our society. If you got the shot and end up paralyzed Medicare has a code for that. If you die within any number of days of being vaxxed they know it. They know the MRNA Vaxxines don't work.

Even with all the data at their fingertips, Biden is doubling down on mandates for a Vaxxine that doesn't work, and a lack of therapeutic treatments that do work to kill you plain and simple.

They speak of Indonesia, but have overlooked Peru and others. Time to get some US governors on board with early treatment.

9 ^ | v · Reply · Share ›

**John Theone** → mrtomsr · 20 hours ago

The governors will have no say in this. The CDC, FDA, WHO, and others will restrict the sale of it in the US and the manufacturers will be more than happy to comply by halting production. See where this going?

4 ^ | v · Reply · Share ›

**Lisa** → John Theone · 20 hours ago

Yes, why isn't this a federal crime against humanity, to withhold a

res, why isn't this a federal crime against humanity, to withhold a perfectly good, Pulitzer prize winning drug, from sick people? How can you explain this horrendous treatment to fellow human beings? What happened to the new law, "Right to try? " If there is a legitimate concern for the health and safety of the citizens of this country, than why isn't everything being tried?

8 ^ | v · Reply · Share ›

**Rachel** → Lisa · 15 hours ago

Actually, is Nobel prize winning medicine, but I got where you were going!:)

3 ^ | v · Reply · Share ›

**John Theone** → Lisa · 20 hours ago

You are so correct. The answer is "MONEY". These people are getting rich off of our misery. Whatever IT is in DC, IT does not represent the true values of the once great USA. These critters should be exiled from the US to whatever country will have them. If we want to keep the last Free Country in the world a good place to live then we will have to fight, and fight hard. By-the-way, a Free Country does not mean "Hand Outs".

2 ^ | v · Reply · Share ›

It's name is Iver,  
You'll be a survivor.  
It makes you well.  
Covid will never get through.

Some D and this drug too,  
Indonesians, they ain't liars,  
So come get a dose  
Of the prophylactic Iver.

4 ^ | v · Reply · Share ›

**Patriot1776** → Darren · 19 hours ago

C, D3, Zinc definitely Iver and HCQ. Q is also in tonic water like some Canada dry or something. Sunlight. UV light. No reason to shut down the world for the flu.

Seems they wanna track us, experiment on us and try kill us with it huh, because they sure don't want to make anyone healthy.

11 ^ | v · Reply · Share ›

**Darren** → Patriot1776 · 19 hours ago

Tonic water contains quinine but the modern variety has very little as compared to what the British Empire employed in India. Querticin can be bought over the counter without prescription but I have no idea of the efficacy in combating the corona.

4 ^ | v · Reply · Share ›

**Anirika Caza** → Darren · 16 hours ago

Quercetin. From the Zelenko protocol page: Quercetin and Epigallocatechin-gallate(green tea); antioxidant; antiviral; ANTIHISTAMINE; are plant polyphenols which form chelates with Zn cations called Zn ionophores which increase the permeability of cell lipid membrane structures. Helps zinc (Zn) get inside the cell where it is a powerful antiviral.

4 ^ | v · Reply · Share ›

**young geoff** → Darren · 10 hours ago

Recall seeing reference to a study that indicated about a 50% improvement in outcome with Querticin. Recommended by Dr Zelenko and the FLCCC.

Meanwhile, Blue Cross, Blue Shield is denying it to its beneficiaries, they claim it is dangerous and not "FDA" approved, ugh, like the clot shot? They will give you a \$50 bonus if you will commit vax suicide though.

When the truth becomes apparent to everyone, and it will. These companies need to have all their assets seized, and sold off with the money going to pay off the National Debt and their leaders tried for Crimes Against Humanity. Think how much money can be raised by seizing all the assets of Zuckerberg, Gates, Bezos, and Wall Street/Fed Reserve/European Central Bank/MSM. There's a Reckoning coming, and I can't wait to get a front row seat and watch these dirtbags hang.

would you mind giving a bit more detail about NAC ? I'm def. interested as I can't get Ivermectin where I live

^ | v • Reply • Share ›

**Mark Anglin** → Joe Six-Pack • 17 hours ago

N-acetyl-L-cysteine ... often taken by professional wine tasters for its liver protection. Also seems to provide some aid to upper respiratory system. It is merely an amino acid and you can't OD

on it, but as soon as it was mentioned as a possible corona therapy, the FDA screeched and all the big stores pulled it immediately.

Swanson's Vitamins (dot) com

**Shagbargh** → Joe Six-Pack · 18 hours ago

It's not as potent or quick acting as Ivermectin unless taken intravenously under a physician's care but as a supplement it build your immune health effectively.

Do you have an online pet supplies? It isn't hard to get some imctn delivered if you don't mind the taste (a few are apple, but you'll probably find they are all out of stock!). Works out about \$1 per dose/week as preventative. I'm taking once per week and I've no particular inclination to eat more oats ;-)  
Dose rate per kg is same as the oat eating mammal type= 600 kg mammal = 600kg of human weight. You can search india protocol and do correct exact calculations. You MUST also take the zinc. Ensure there is ONLY ivermectin, not a combination. Lots of brand names, just check the actives. If you are smart enough to be here, you'll work it out fine ;-)

^ | v · Reply · Share ›

**"Enemy of the State"** → Joe Six-Pack · 12 hours ago

N-acetylcysteine.
